

# VIVIN JOGHEE

Financial Technology Automation, Implementation, and Delivery Lead - Payments & Swift Infrastructure

Blk 227D, Compassvale Drive, Singapore | +65 9885 7422 | Vivinjoghee@gmail.com | [linkedin.com/in/vivin-joghee](https://www.linkedin.com/in/vivin-joghee) | <https://www.vivinjoghee.com/>

## PROFESSIONAL SUMMARY

Results-driven Senior Financial Technology professional with 13+ years of experience architecting and delivering enterprise-scale Swift messaging, cross-border payment, and financial infrastructure solutions for Tier-1 banks and market infrastructures across APAC, EMEA, and the Americas, and also serving as Continuous Integration, AI Tooling Lead at Swift (Global Professional Services) and pursuing an MSc in Financial Technology at NTU Singapore.

Proven track record in leading ISO 20022 migration programs across 10+ global market infrastructures, executing zero-downtime data center migrations for Swift infrastructure, deploying AI-driven automation, and managing cloud-native deployments on Azure. Combines deep technical expertise in Swift, Python, and DevOps toolchains with strong leadership capabilities and a growing command of Artificial Intelligence, blockchain, machine learning, and FinTech innovation.

## EDUCATION

| <b>Security &amp; Compliance</b> | Hardware Security Module (HSM), Swift CSP / CSCF, Secure IAM, Regulatory Governance                                    |
| <b>Integration &amp; APIs</b>    | Swift API (GPI, SLVP, G4C, GCase), REST APIs, Axway, Swift Translator, IPP Workflow designer                           |
| <b>Leadership</b>                | AI and Tooling Lead, Continuous Integration Lead, Program Delivery, ISO Migration Governance                           |

## PROFESSIONAL EXPERIENCE

---

### Senior Financial Services Industry Consultant

*December 2021 – Present*

*Swift Terminal Services, Singapore*

- ▶ Lead Continuous Integration function for Global Professional Services, governing AMH Docker image lifecycle, server provisioning via Ansible, and CI/CD pipeline configuration using CloudBees/Jenkins, improving release velocity and reducing deployment errors across the team.
- ▶ Designed and deployed an AI Copilot solution leveraging JIRA REST APIs and CloudBees pipelines to automate Professional Services workflow management, centralize technical documentation, and improve operational efficiency. Serving as the AI and Tooling Lead, driving AI-enabled process optimization and tooling innovation across Professional Services.
- ▶ Spearheaded ISO 20022 migration programmes for 10+ global market infrastructures, including MEPS L4L (Singapore), TH Bahtnet, HK CHATS, UK CHAPS, ZA SAMOS, CBPR+, AU HVPS, PH PhilPaSS, JO RTGS, BN RTGS, and ISO Accelerated Packs for smaller Market Infrastructures.
- ▶ Architected and delivered complex Swift messaging integrations for global clients, including custom transformation configurations to support back-office payment and settlement workflows.
- ▶ Developed Python-based data visualization dashboards and machine-learning models to surface operational insights from customer data, directly informing product and service decisions.
- ▶ Managed regulatory governance requirements across environments: secure password policies, identity usage controls, and monitoring tool compliance.

### Technical Lead – Enterprise Financial Messaging

*December 2019 – December 2021*

*BNY Mellon Technology, India*

- ▶ Led enterprise-wide deployment and configuration of Swift applications (SAA, AWP, SAG, SNL, IPLA) on Azure cloud infrastructure, driving BNY Mellon's cloud-first migration strategy for its messaging platform.
- ▶ Architected and delivered Swift Go Microgateway integration, enabling API connectivity for SLVP, GPI, G4C, and GCase use cases.
- ▶ Developed Ansible automation playbooks to standardize Swift application installation, integration, and configuration, cutting provisioning time significantly across environments.
- ▶ Wrote Python scripts for deployment automation and operational tooling, increasing consistency and reducing manual configuration risk.
- ▶ Implemented Swift Customer Security Framework (CSCF) 2020, ensuring full compliance across the enterprise Swift estate.
- ▶ Received the Passion for Excellence award in recognition of outstanding delivery and innovation impact.

### Lead Analyst – Global Swift Messaging

*January 2015 – December 2019*

*Standard Chartered GBS, India*

- ▶ Led data center migration for Swift applications, overseeing the physical and logical relocation of Swift infrastructure (SAA, AWP, SAG, SNL, HSM) with zero-downtime cutover, ensuring continuity of critical cross-border payment operations.
- ▶ Led end-to-end Swift infrastructure operations and upgrade programmes across a global footprint, managing SWIFTNet 7.2 and 7.3 migrations (SAA, AWP, SAG, SNL, IPLA) for one of Asia's largest banks.
- ▶ Executed migration from legacy Swift SAG FTI/FTA module to AMH, modernizing FileAct processing and aligning with Swift's strategic roadmap.
- ▶ Delivered Swift Customer Security Framework (CSCF) 2018 and 2019 implementations and Swift Standard Release upgrades (2017–2019), maintaining full regulatory compliance.
- ▶ Led Hardware Security Module (HSM) upgrade from v6.0 to v6.1 across production environments.
- ▶ Recognized as Value Champion for consistent high-impact delivery across a 5-year tenure.

**Software Engineer – Application Maintenance**

*December 2012 – December 2014*

*Syntel Inc, Chennai / India*

- Maintained and tuned Belk.com’s Java-based Blue Martini e-commerce platform, executing patch deployments, JVM/heap tuning, and root-cause analysis to ensure platform stability under high transaction loads.
- Engineered observability and automation pipelines using CA Wily, Splunk, and Shell scripts to instrument application servers, trigger threshold-based alerts, and automate recurring BAU operations, reducing mean-time-to-detect and operational overhead.
- Award-winning streak for exceptional performance in the first year of career.
